## ***Installation Notes***

This document will instruct the user how to install the SonnetLab toolbox for Matlab (from here on called SonnetLab). This guide assumes you have already downloaded the archive for SonnetLab and have extracted the files to a suitable location. Integrating SonnetLab with your Matlab environment is as simple as adding the scripts to your Matlab path. To add the folder of scripts to your Matlab path do the following:

1. Open up Matlab.
2. Go to File > Set Path. This will launch a new window.
3. Click the button labeled 'Add With Subfolders...'
4. Browse to the folder where you extracted SonnetLab.
5. Double click on the folder for SonnetLab
6. Double click on the Scripts folder
7. Click on the 'OK' button.
8. Click on the 'Save' Button.
9. The path has been set. You may now close the 'Set Path' window by either clicking on the 'Close' Button or clicking on the red X in the corner of the window.

**Note:** If you ever change the location of where SonnetLab is stored then you have to complete these steps again to add the interface to your Matlab path.

## Contact

Your feedback is important to us. If you have any questions or comments about SonnetLab, please contact Sonnet Support by email at [support@sonnetsoftware.com](mailto:support@sonnetsoftware.com).

Please make sure you are using the most up to date version of SonnetLab before submitting a bug report. When submitting a bug report please include the Sonnet project file that generated the error (Sonnet project files have the extension .son) and the output from the command “SonnetMatlabVersion”. The more information that that we receive the faster it will be for us to resolve the issue and contact you back.
